

AEON UK Consultancy

Optimized AR Analytics & Cash Flow Insights

AEON UK Consulting's Optimized AR Analytics & Cash Flow Insights is a powerful Power BI-driven analysis of billing, collections, and outstanding payments. This project uncovers aging trends, overdue risks, and client payment behaviors, enabling data-driven decisions to optimize cash flow, enhance efficiency, and strengthen financial stability.

Final Insights & Optimization Strategies

Key Insights

- High overdue amounts indicate delayed payments and increased credit risk.
- A few clients hold most outstanding dues, requiring focused recovery efforts.
- Gaps in billed vs. collected amounts impact cash flow, needing efficiency improvements.

Key Recommendations

- Automate payment reminders, set stricter credit terms, and improve follow-up processes to reduce overdue invoices.
- Introduce early payment discounts, enforce late payment penalties, and establish clear payment timelines to encourage timely collections.
- Use predictive analytics to identify potential payment delays, optimize collection strategies, and strengthen financial planning.
